Digitally Printed Glass	15	In-House Capabilities	33
SofTones™	19		

In 1956, Hollander Glass started as a small glass and mirror company offering a variety of glazing products to the general public, however as the market evolved, so did Hollander. During the Stained Glass Renaissance of the 1970s, Hollander Glass began offering a wide variety of Art Glass and accessories to meet the changing needs of a rapidly growing market. Our evolution continued into the specialty glass world as we began to stock the largest variety of glass in the United States, our warehouses were being filled with all types of Pattern Glass, Rolled Glass, Antique Mirror, and Antique Glass.

The 1980s brought on a rise of interest in Historical Window Restoration. As a new specialty glass market emerged, again Hollander evolved. Our offerings quickly expanded to include imported restoration style glass as well as the creation of our Circa Series, a Restoration Window Glass™ available in multiple thicknesses and large temperable sheets, manufactured by us in Houston, Texas.

Today, while our inventory and capabilities have profoundly expanded, our goal is still simple. We strive to offer our customers a high quality product, on-time and at a reasonable price. We know that any success is the result of a disciplined and consistent approach to this principle.

Please come and experience the Hollander difference at either of our fabrication locations in Atlanta, GA and Houston, TX or reach out to one of our highly knowledgeable service centers in Canada and New York. We will earn your trust with the same commitment to service that we have offered the industry for over 65 years.

Digitally Printed Glass

With Hollander digital glass printing, you can print designs, patterns, solid colors, and logos direct to glass. Our state-of-the-art printer utilizes brilliant ceramic inks and prints at 1440 dpi. You can submit a ready to print file, choose from any of our stock prints, or have the Hollander design team start from scratch. Our in-house design team will assist you with graphic design and project management support for your project. We work with small to large projects of all types, for a variety of industries.

SPECIALTY LAMINATED PRODUCTS

Hollander offers custom specialty lamination capabilities. We can produce a range of custom laminated glass products using both EVA film and cold poured liquid resin. Our laminated glass products range from Restoration Window Glass™ to pattern glass. The maximum fabrication size is 100" x 144", with overall thickness ranging from 1/4" to 4" thick. Our laminated glass work has been seen in outdoor installation projects, glass door panels, skylights, windowpanes, and so much more!

NON-TEMPERABLE

IN-HOUSE CAPABILITIES

Specialty Glass Tempering

Customers can choose from the largest selection of specialty glass in North America for their decorative glass projects. The combination of quality, specialty glass knowledge, and selection makes our tempering operation the preferred choice for architects, glass companies and designers.

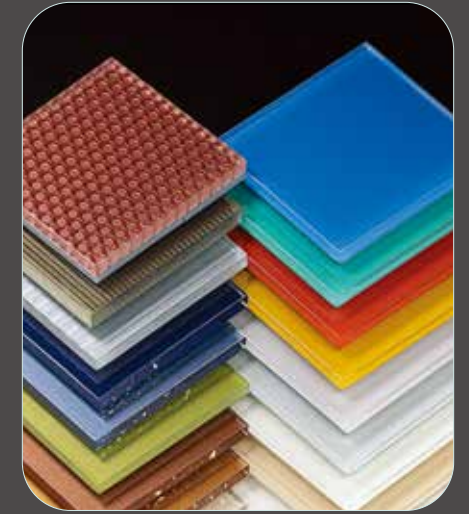

Specialty Insulated Glass Units

Hollander's specialty insulated glass line produces both clear and patterned insulated glass units. Overall thickness available from 1/2" up to 1".

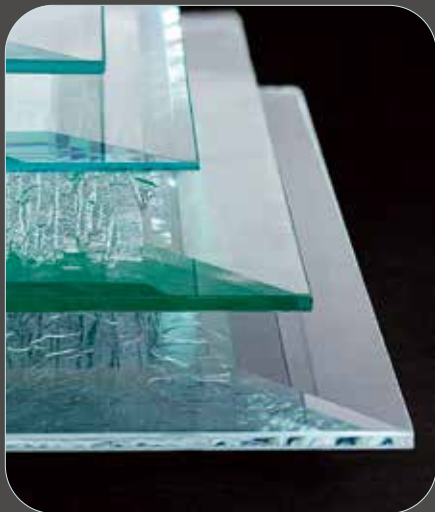

Digital Glass Printing

State of the art direct to glass digital printing technology capable of up to 1440 DPI high resolution printing on panels up to 63" x 98". Expert in house design team available for project collaboration.

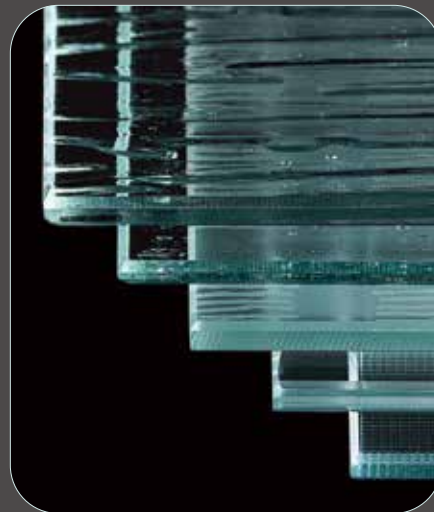

Custom Back Painted Glass

We offer custom back painted glass in virtually any color you can imagine. We also offer metallic and pearlescent colors. Our back painted glass is extremely durable and suitable for indoor and outdoor applications.

Specialty Glass Beveling

We have the ability to produce a variety of straight and shaped beveled edges on many of our specialty glass options in thicknesses ranging from 1/4" to 1-5/8".

Specialty Glass Polishing & Mitering

We can provide a variety of options from High sheen Flat polished edges, Mitered edges to micro polish on virtually all of our specialty glass products.

Specialty Glass Holes & Cutouts

We provide precisely cut holes and cutouts to your specifications in our specialty glass products.

Specialty Glass Laminating

A multi-option lamination line that can employ a high-performance EVA or liquid resin to bring together a variety of safe and reliable specialty glass products.

CNC Glass Cutting Table

Our CNC glass cutting table enables us to provide precisely cut glass to your specifications.

ANSI Z97.1 Safety Backing

Our proprietary safety backing process is ANSI Z97.1 certified all while only adding 1/32" of thickness to the glass. This backing is suitable for any opaque glass, printed glass or mirror.
